msf > search ThinVNC

Matching Modules
================

   #  Name                                        Disclosure Date  Rank    Check  Description
   -  ----                                        ---------------  ----    -----  -----------
   0  auxiliary/scanner/http/thinvnc_traversal    2019-10-16       normal  No     ThinVNC Directory Traversal

Interact with a module by name or index. For example info 0, use 0 or use auxiliary/scanner/http/thinvnc_traversal
```

```
msf > use 0
msf auxiliary(scanner/http/thinvnc_traversal) > show options

Module options (auxiliary/scanner/http/thinvnc_traversal):

   Name      Current Setting  Required  Description
   ----      ---------------  --------  -----------
   DEPTH     2                yes       Depth for Path Traversal
   FILEPATH  ThinVnc.ini      yes       The path to the file to read
   Proxies                    no        A proxy chain of format type:host:port[,type:host:port][ ... ]. Supported proxies: socks5, http, socks5h, sapni, socks4
   RHOSTS                     yes       The target host(s), see https://docs.metasploit.com/docs/using-metasploit/basics/using-metasploit.html
   RPORT     8080             yes       The target port (TCP)
   SSL       false            no        Negotiate SSL/TLS for outgoing connections
   THREADS   1                yes       The number of concurrent threads (max one per host)
   VHOST                      no        HTTP server virtual host

View the full module info with the info, or info -d command.

msf auxiliary(scanner/http/thinvnc_traversal) > set RHOST 10.150.150.69
RHOST => 10.150.150.69
msf auxiliary(scanner/http/thinvnc_traversal) > set RPORT 60000
RPORT => 60000
msf auxiliary(scanner/http/thinvnc_traversal) > show options

Module options (auxiliary/scanner/http/thinvnc_traversal):

   Name      Current Setting  Required  Description
   ----      ---------------  --------  -----------
   DEPTH     2                yes       Depth for Path Traversal
   FILEPATH  ThinVnc.ini      yes       The path to the file to read
   Proxies                    no        A proxy chain of format type:host:port[,type:host:port][ ... ]. Supported proxies: socks5, http, socks5h, sapni, socks4
   RHOSTS    10.150.150.69    yes       The target host(s), see https://docs.metasploit.com/docs/using-metasploit/basics/using-metasploit.html
   RPORT     60000            yes       The target port (TCP)
   SSL       false            no        Negotiate SSL/TLS for outgoing connections
   THREADS   1                yes       The number of concurrent threads (max one per host)
   VHOST                      no        HTTP server virtual host
